

Timeless healing Pisces energies

The energy of the zodiac sign Pisces is that of water, a gentle water of compassion for ourselves and others, a water filled with love that leads us to melt within ourselves all resistance to the light, all resistance to the energy of love.

It pushes us to help ourselves and each other, because we all bathe in the same bath, which is called LIFE. LIFE is LIGHT, and if we separate ourselves from it we experience nothingness, which makes us feel anguish and leads us to fill our being with chimeras to compensate for this separation from the SOURCE.

Let's unite within ourselves and be the gentle waters that are beneficial and kind to ourselves and others.

Emotions are there to guide us on our path, because they are the messengers of the soul: they tell us what is OK on our journey, what needs to be reviewed and what needs to be encouraged. They leave us clear messages when we know how to listen to them and accept them.

This healing will benefit from Mother Earth's love for us, the Great Goddess of the waters and of welcoming Life, and from Jesus Krist who came to bring this message of union in life and for life to humans at the beginning of the Age of Pisces, there is more than 2000 years ago. They will be there to cleanse our inner waters of all the dross of separation and help us return to the SOURCE OF LIFE.

It's a complete healing that lasts 16 minutes and then lasts for 2 hours to integrate. So I invite you to lie down and let it infuse you gently and fluidly. Thank you Divine Source for this healing. Gratitude.
