

# Timeless treatment

## Geminis energy

Gemini is an air sign, the first in the astrological solar wheel of the year. It brings us the sweetness of spring airs that go towards the hottest puffs of summer. He brings us through communication the breath of vitality of the ram and enjoins us to say our impulses of the soul. To put in word our projects. To tell us. To fully enter our solar wheel, into the materialized life on earth. It is a playful and fast air. Who can invite us to keep our projects inside and take the time to verbalize them in ourselves.

With an intelligent vivacity, the gemini helps us to set up the words to be. His breath is connected to the divine Word if it is in his heart. Otherwise, he can be his own opponent. If he is aligned in him he can be his breath of creation; if he is disconnected from himself he can build something toxic for himself and others. By his word, he can stop what is in his way and ascend to his greatest light; just as he can collide with his ego and descend into his own self-created hell.

A calm mind will allow to return to the heart; a mind caught in the toxic game of ego would launch its wheel and create an unhealthy communication for oneself and others. To appease the mind is an issue, and to bring it back to the heart and into the divine. To make it the most beautiful tool in the service of Creation.

Stress will be transmuted into pure luminous joy and allow the clear and awake mind to materialize its luminous dreams.

These themes are cleaned during this care so that this Breath is beneficial for you and humanity.
